

Turn Expertise Into a Measurable Media-to-Revenue Asset

DX Virtual TV is building more than a place to broadcast a show. We are creating a Video-to-Revenue ecosystem designed to help Thought Leaders turn professional television content into an ongoing authority, audience-development and business-development asset.

THE VALUE PROPOSITION

We do not promise a predetermined audience. We provide the content, distribution, audience-development, measurement and conversion infrastructure designed to help you build and understand the audience that matters to your business.

What You Are Building With DX Virtual TV

1 CONTENT

Professional television episodes and reusable video assets built around your expertise.

2 DISTRIBUTION

A recurring presence across the DX Virtual TV connected-TV, mobile, web and digital ecosystem.

3 AUDIENCE DEVELOPMENT

Calls-to-action and viewer pathways designed to turn passive watching into measurable engagement.

4 CONVERSION INTELLIGENCE

Trackable signals such as viewing activity, page visits, registrations, inquiries and qualified leads where technology and permissions allow.

**YOUR EXPERTISE > PROFESSIONAL VIDEO > DISTRIBUTION > VIEWER ENGAGEMENT
CALL-TO-ACTION > LEAD > BUSINESS OPPORTUNITY**

Why Join an Emerging Network Now?

Founding Thought Leaders can establish their television presence while DX Virtual TV builds its viewing marketplace and audience intelligence. Together, we can learn what content attracts attention, what topics create engagement, and what calls-to-action move viewers toward a business relationship. As the network grows, the data becomes increasingly valuable to participating Thought Leaders.

The goal is bigger than getting you on television.

Build a show. Build an audience. Build measurable pathways to opportunity.

DX Virtual TV does not guarantee a specific number of viewers, leads, clients, sales or revenue. Results depend on content quality, audience fit, promotion, offer strength, consistency and other factors. Measurement capabilities may vary by distribution platform and viewer permissions.
